

## No Wipes Down The Pipes

Even if a product says it is “flushable”, unless it is toilet paper, it should not be flushed.

This includes but is not limited to:

- Diapers – including cloth, cotton, disposable or plastic
- Flushable, disposable cleaning or baby wipes
- Paper towels, cloth towels or any type of rag
- Feminine hygiene products
- Facial tissues

Please place the items listed above in a trash can.

Baby wipes are not designed to break down in water like toilet paper.

Putting these items down the toilets causes many issues such as:

- plugs our sewer pipes
- causes raw sewage to back up into our buildings
- potentially cause damage to expensive equipment at our lift stations and facility.
